Mirage® Pop-Up Display —
The Legendary Pop-Up

Skyline®
HELPING
THE WORLD
TRADE.

The World’s Best Pop-Up

Mirage® pop-up frames are the most durable available. If impacted, the fiberglass or carbon Mirage frames flex and bounce back without damage, unlike aluminum. Mirage performs every time and will not leave you stuck at a show with a frame that’s damaged or bent. That’s peace of mind. **Mirage frames and channels have a lifetime warranty.**

Pop-Up Portability

Great look and convenience. Mirage pop-up displays give you a classic curved look and uninterrupted graphics for a big brand presence. Mirage units can be used individually or connected together for a larger presence at major shows. Mirage units are easy to set up, ship and transport.

Highest Quality Graphics

Make an impression on clients and prospects with the highest quality, longest lasting graphics. Skyline graphics are produced in house for the very best fit and finish. Unlike other pop-ups, Mirage channels feature special magnetic strips that provide perfect graphic alignment for a truly seamless appearance.

Big Impact In Smaller Spaces

Attract attendees with Mirage tabletop displays. They are available in multiple widths and heights, pack in a single case and install with ease.

“We were looking for an exhibit that was consistent in quality with the products and services we offer.” – Big Bear Promotional

Backlighting Attracts

Mirage can be backlit with Skyline LED lighting to attract attention to your brand and message.

Convex Back Panels

Mirage is designed to accommodate graphics on both front and back for island applications.

Bubble Panel

Bubble Panel gives Mirage a new look and can be backlit to attract attention. It works with all Mirage frames and is easy to install or change out as you update messages.

“Our latest trade show was a huge success, and Skyline was a major factor.” – John Deere-Green Tech

Accessories Add Functionality

Mirage has a variety of accessories that give you a custom look and provide the functionality to meet your specific objectives. Accessories include headers, structural components, flat screen mounts, shelving, apparel racks and more.

Protective Cases

Mirage displays pack neatly in protective, compartmentalized cases that have easy access and wheels for easy transport.

Which Mirage Frame Is Right For You?

Mirage revolutionized the pop-up display with a frame that is lighter weight and more durable than aluminum. It is engineered with frame triangulation to maintain panel alignment on uneven floors. Mirage has three quality frame options designed to fit your specific needs.

Mirage Classic

Fiberglass Frame, Manually-Attached Connectors

The legendary pop-up! Mirage's fiberglass rods flex without breaking or kinking. The lightweight frame pops up instantly and locks into place with manual, spring-loaded connectors.

Mirage Advantage

Fiberglass Frame, Self-Locking Magnetic Connectors

Mirage Advantage combines the lightweight durability of a fiberglass frame with the speed of a self-locking frame. The frame pops up and connectors lock in place with magnets.

Mirage Plus

High-Tech Carbon Rods, Self-Locking Without Connectors

The industry's premier pop-up! Mirage Plus' high-tech carbon frame is self-locking. Without connectors, it instantly pops up and locks in place.

Versatile Mirage® Fits Any Space

Mirage is available in several sizes from tabletops to full 10' (3 m) units. Larger inline exhibits are created by seamlessly connecting units together. Mirage can also be configured to create 3- or 4-sided island exhibits.

Monitor Mount For Digital Presentations

Mount up to two 15 lb. monitors or up to four 10 lb. monitors on a 10' curved Mirage.

Convenient Case Table

Transform your cases into a branded workstation. Table top and panels attach quickly and easily with magnets.

LED Arm Lights

24W LED rivals the brightness of a 200W halogen lamp, but uses 88% less energy! It is also more durable and can be repacked sooner than halogen.

Mirage® Models

10' 92"

Approx. 99 lbs.
(45 kg) with cases

20' Gull Wing

20' Serpentine

Oval Case
